# President's Column

Dear LGS Members:

Thank you to those who attended our BBQ Ice Breaker. We had approximately 55 attendees that enjoyed the food, music, and friendship of our members and guests. Attendance was a little low compared to previous years, so I encourage you to be an active member in our society and our events. Our society is what we make of it.

We will not have our usual monthly meeting for October. Instead, we will have our LAGCOE breakfast at the Cajundome Terrace. Please come support the UL students who were chosen to compete in a poster competition. More information can be found below in the calendar of events.

The UL Geology Museum, in conjunction with the Lafayette Science Museum and LAGCOE, has developed a new exhibit "Energy Unearthed: The Science of Petroleum Exploration." The exhibit is slated to open to the public October 21, so be sure to come check it out.

Mark your calendars and participate in these events:

- LAGCOE, October 24–26. For more information, see their website at <http://www.lagcoe.com/home-expo>.
- October meeting: We will meet at the **Cajundome on October 25th** from 7:00 am–9:00 am for a breakfast meeting. UL students will be presenting posters detailing their current research. The bi-annual LAGCOE Exposition begins at 9:00 am. You may register for the LAGCOE at <http://www.LAGCOE.com/register>. Registration is free and open to all industry members.
- 2017 GCAGS/GCSSEPM Annual Convention will be held November 1–3 in San Antonio, Texas. There are many field trips and short courses, as well, so be sure to check out their website at <http://www.gcags2017.org>.
- Our November meeting will be held at the usual time on November 15. Dr. Jon Rotzien from UL will be our guest speaker.
- The Geosteering short course, "Beer and Steer," will be held on December 7 from 6:00 pm–8:00 pm at the Jefferson Street Pub. We will send out more information soon.

## **Lafayette Geological Society**

### **2017-2018 Sponsorship & Advertising Changes**

Friends of the Lafayette Geological Society,

As many of you know, the Lafayette Geological Society has four main objectives. They are to advance Geology as a Science and profession, to encourage cooperation and fellowship between all members and others interested in geological problems, to foster higher standards of education and ethics among members and students, and to encourage public appreciation of the utility and application of geologic science. We try to accomplish these objectives through a series of activities and events scheduled throughout the year. In doing so we incur a number of expenses. If you have contributed to these activities in the past we thank you for your generosity and hope that you will consider continuing your support of the LGS in these tough times. For those that have not yet had the opportunity to lend support we hope that you will consider helping us provide these services to our Geoscience community and encourage the education and interest in the Geosciences. Rather than soliciting sponsorship throughout the year as money is needed for upcoming events we would like to send you a list of the events planned for the year (listed below) and ask you to consider making a donation towards these activities. Also, the LGS board has decided to no longer sell advertising space. Instead, in return for your sponsorship you will receive free advertising space in our bulletin and webpage. In addition, you will be recognized for your level of support at all of our activities including our monthly meetings.

Thank you for your consideration and your continued support of the LGS. If you have any questions, please contact Rudy Gibbs at (337) 521-2174.

- Here's your lagniappe for the month—a fun read for your spare time. In “The Secret Knowledge of Water,” Craig Childs leads you through the deserts of the southwest in pursuit of water. You follow along as he includes stories of his adventures mixed with a little geology and archaeology. I hope you enjoy.

I'll see you for breakfast!

Jennifer
